## **FOREWORD**

I am happy to forward the report on "Earth Sciences Research in India - A study based on Georef Database" compiled by S/Shri J.R. Sahu, D.B.Ramesh, D.P.Sandha, B.K. Dalai and M.K. Seth of our Laboratory. This study was funded by the Department of Scientific and Industrial Research under the NISSAT programme with our Laboratory.

It is hoped, the data shown in this report will throw light on the research efforts of Indian Geologists/Scientists/Scholars in the Earth Science.

PROF. H.S. RAY  
DIRECTOR

**REGIONAL RESEARCH LABORATORY

## **ACKNOWLEDGEMENT**

*We are deeply indebted to Prof. H.S. Ray, Director, Regional Research Laboratory, Bhubaneswar for his encouragement, guidance, support and infrastructural facilities throughout the study of this project.*

*We express our gratitude to Dr. A. Lahiri, Advisor, National Information System for Science & Technology (NISSAT), Department of Scientific and Industrial Research (DSIR), New Delhi for his help and advise.*

*We also express our thanks to Smt. Sridevi Ravindran, Director, NISSAT and Smt. Kamini Mishra, Senior Scientific Officer, NISSAT for their help in all administrative matters related to this project.*

## **S Y N O P S I S**

This study has been taken up to quantify and map the research efforts of Indian Geologists Scientists Scholars in the field of Earth Sciences. For this purpose CD-ROM version of the GeoRef database published by the American Geological Institute, USA for the years 1990-1997 is used. The database has devised its own classification system to organise the literature as per their 50 Category Codes (CC). The GeoRef record comprises as many as 17 fields. Only records published during the years 1990, 1992 and 1994 were downloaded from the CD-ROM version of GeoRef database using the following combination of bibliographic data fields for the analysis. There were about 1272 records from India in GeoRef database in 1990 and 1004 records in 1992 and 560 records in 1994. India ranks 10th in the world based on the publication data. USA tops the list followed by Canada. As per language of publication is concerned for the year 1990, English tops the list. More than 75% of the total publications published by the Indian scientists are from India. All the publications published by the Indian scientists are in English. Only two articles written in Hindi. More than 90% of publication published by the Indian scientists are of Analytic in nature. About 50% of the papers are published in Serial publications. City-wise distribution of Indian publications, Calcutta tops the list followed by Lucknow and Hyderabad. A comparative figure of publications published by the Indian scientists vs. world in all the 38 subject fields categorised as per the GeoRef database. Among all the fields of research, Igneous and Metamorphic Petrology is tops the list followed by Applied Geophysics (20), Economic Geology, Stratigraphy, Structural Geology, Engineering Geology. It is found that all the top 10 publications are published from India. Geological Survey of India (GSI), India tops the list followed by Wadia Inst. Himalayan Geol., Dehra Dun, India and both together take 30% share of the total publications. 70% of total publications is shared by the first 10 institutions in India during the year 1990. As per the publications count among universities, Banaras Hindu Univ., Varanasi tops the list. USA is on the top list by contributing maximum number of publications in each and every subject category. India has contributed to some extent more publications in the area of Igneous and Metamorphic Petrology in comparison with other countries. Average Impact Factor of SCI has increased from 0.768 in 1990 to 3.112 in 1994, although the total number of publication reduced from 1272 to 560.

This study has been taken up to quantify and map the research efforts of Indian Geologists/Scientists/Scholars in the field of Earth Sciences. For this purpose CD-ROM version of the GeoRef database published by the American Geological Institute, USA for the years 1986-1997 is used. GeoRef contains over 1.9 million records of North America since 1785 and other areas of the world since 1933. The database has devised its own classification system to organise the literature as per their 50 Category Codes (CC). The GeoRef record comprises as many as 17 fields.

## METHODOLOGY

Only records published during the years 1990, 1992 and 1994 were downloaded from the CD-ROM version of GeoRef database using the following combination of bibliographic data fields for the analysis:

Set 1 PY =1990/1992/1994 and INDIA IN AF;  
Set 1 and SO;  
Set 1 and CP;  
Set 1 and CC;  
Set 1 and PY;  
Set 1 and LA;  
Set 1 and PY  
Set 1 and DT;  
Set 1 and PY;  
Set 1 and BL;  
Set 1 and AF & CC

(AF=Author Affiliation; SO=Source; CP=Country of Publication; LA=Language of the Article; PY=Year of Publication; CC=Category Codes; DT=Document Type; BL=Treatment of the work)

There were about 1272 records from India in GeoRef database in 1990 and 1004 records in 1992 and 560 records in 1994 .

## **LIMITATIONS OF THE STUDY**

In this study, the CD-ROM version of GeoRef database for the year 1990-1997 is used. All the publications of Indian scientists published during 1990, 1992 and 1994 in India and abroad covered in this database have been downloaded for the purpose of data analysis. Some publications belonging to these years which are not covered in the GeoRef database by the end of 1997 are not used. The decline output shown from 1990 to 1992 and 1994 supports that the CD-ROM version of the database is not updated timely and the coverage of publications from world over in the database is also on the decline side.

## **DATA ANALYSIS**

The following indicators have been used for the data analysis:

- by type of publication,
- by source of publication,
- by country of publication,
- by institution's name,
- by institution place,
- by language of publication,
- by subject classification of publication.

Further, the following indicators have also been studied:

- Indian contribution to world's literature in earth sciences,
- Top priority areas for research in earth sciences in India vs world,
- Top priority areas for research of other countries in earth sciences,
- Where does Indian publications appear,
- Ranking of top journals/source where Indian papers were published and its Impact Factor values,
- Major Institutions and their Priorities areas of research in earth sciences in India,
- Geographic distribution of publications.

Details of the data analysis were tabulated and presented as follows:

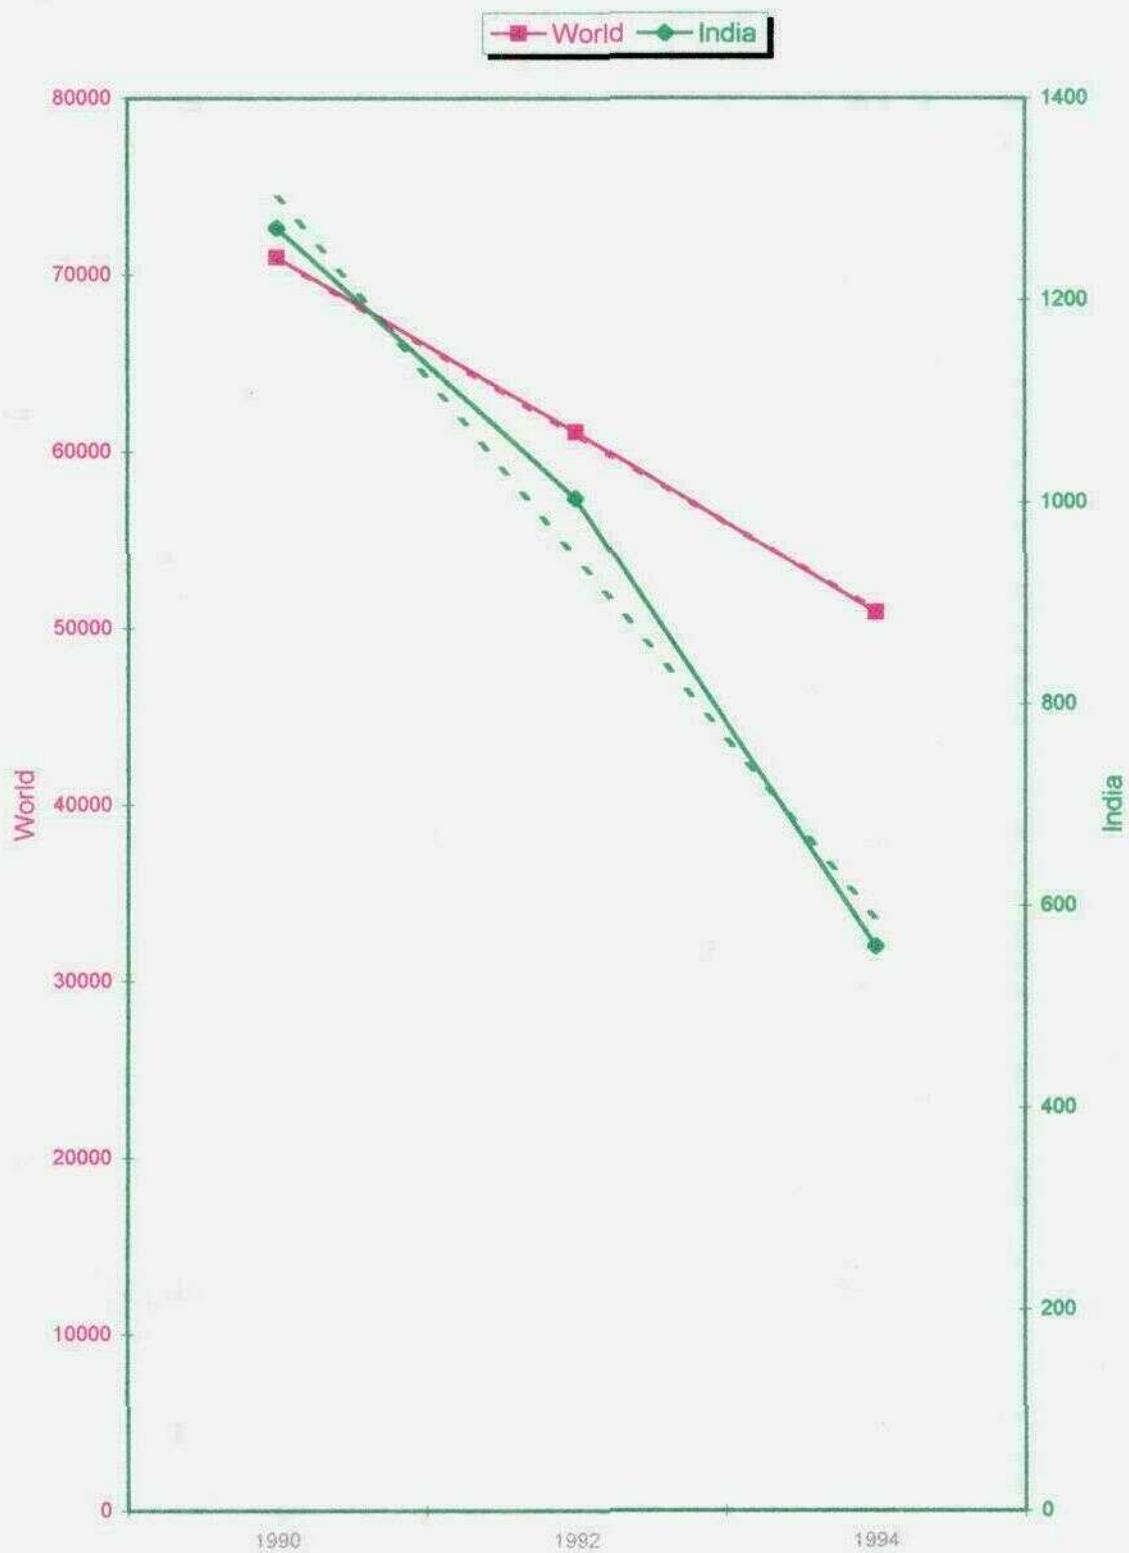

## COUNTRY-WISE DISTRIBUTION OF TOTAL EARTH SCIENCES PUBLICATIONS

As per the data presented in the Table 1, Fig. 1 & Table 1A, India ranks 10th in 1990, 9th in 1992 and 11th in 1994 in the world. USA tops the list during 1990, 1992 and 1994. Almost all the countries recorded a decline trend in the number of papers produced during 1992 & 1994 in comparison with 1990. This may be due to late coverage of the articles and updation of the database. Russia has gone down to 9th rank during 1992 and 1994 from its 3rd rank during 1990. There are some slight shifts in ranks during 1992 and 1994 from 1990.

## **LANGUAGE-WISE DISTRIBUTION OF WORLD'S EARTH SCIENCES PUBLICATIONS**

So far as language of publication is concerned for the year 1990, English tops the list followed by Russian, Chinese, French, German & Japanese. However, during 1992 & 1994 Chinese occupied the second position (Table -2 & 2A). However during 1992, French occupied the 2nd position followed by Chinese, Russian, Japanese, Spanish and German. In 1994, Chinese occupied 2nd position followed by Russian, Japanese, Spanish, French and German. English vs. other languages is presented in Fig.2.

**SUBJECT-WISE (Category Code) DISTRIBUTION AND SHARE OF INDIAN EARTH SCIENCE PUBLICATIONS vs WORLD**

The following Table - 8 presents a comparative figures of publications published by the Indian scientists vs world in all the 38 subject fields categorised as per the GeoRef database. The five leading areas of research in earth sciences in India during 1990 as presented in Table - 8 are: (1) Igneous and Metamorphic Petrology (05A); (2) Applied Geophysics (20); (3) Economic Geology (27A); (4) Stratigraphy (2); and (5) Structural Geology (5).

In 1992, the five leading areas of research in earth science in the world as presented in Table - 8 are: (1) Stratigraphy(2); (2) Applied Geophysics (20); (3) Igneous and Metamorphic Petrology (05A); (4) Structural Geology (5); and (5) Hydrogeology (21).

In 1994, the five leading areas in India are 1) Engineering Geology (30); (2) Igneous and Metamorphic Petrology (05A); (3) Applied Geophysics (20); ; (4) Stratigraphy(2); and (5) Geochemistry of Rock and Soils (02C).

The world's five leading areas are: (1) Environmental geology; (2) Igneous and Metamorphic Petrology (05A); (3) Stratigraphy(2); (4) Structural Geology (5); and (5) Applied Geophysics (20).

#### MAJOR SUBJECT AREAS (CATEGORY CODE)-WISE DISTRIBUTION OF INDIAN EARTH SCIENCE PUBLICATIONS

Among all the fields of research, Igneous and Metamorphic Petrology (05A) is tops the list followed by Applied geophysics (20), Economic Geology (27A), Stratigraphy (12), Structural Geology (16), Engineering Geology 30) during the years 1990. However, in 1992, Engineering Geology (30) occupies the first position and in 1994 Applied Geophysics occupies the first position (Table - 9)

09	Paleobotany	Cent. Earth Sci. Stud., Trivandrum (19) & Birbal Sahni Inst. Paleobot. (5)

Table - 9A shows that GSI tops the list in contributing a major share in almost all the areas of the research. Where as the areas like Oceangraphy(07), Environmental Geology(22), Paleobotany(09), Solid-Earth-Geophysics(18), Engineering Geology(30) and Sedimentary Petrology(06A), other institutions have contributed more publication than GSI.

#### **Institution vs Category Code-wise Distribution of Indian Earth Science Publications as per Publications Count**

It is observed from Table - 10 that in almost all the subject areas Geological Survey of India (GSI), India has contributed its publications. In about 9 areas GSI is leading followed by Wadia Institute of Himalayan Geology, Dehra Dun in 6 areas, IIT's in 5 areas, Indian School of Mines, Dhanbad in 4 areas, Andra University in 4 areas, NIO, Goa in 3 areas, NGRI, Hyderabad and ONGC, Dehra Dun in 2 areas each.

It is observed from the Table - 10A that GSI; Indian School of Mines, Dhanbad; IISC, Bangalore have contributed their major share of publications in the area Engineering Geology(30). NIO, Goa has contributed its major share in the area of Oceanography(07); Department of Atomic Energy in Area of Economy Geology of Ore Deposits(27A); ONGC in the area of Economic Geology of Energy Resources(29A) and Wadia Institute of Himalayan Geology in the area of Igneous and Metamorphic Petrology(05A).

#### **RANKING OF TOP PUBLICATIONS WHERE INDIAN EARTH SCIENCE PUBLICATIONS PUBLISHED**

Below mentioned Table 11 provides ranking of top publications where Indian scientists in the field of Earth Sciences have published their research findings. It is found that all the top 10 publications are published from India. Publications of GSI like Records of the Geological Survey of India(152), Abstracts - Indian Geological Congress and National Seminar(131), Journal of the Geological Society of India (106), Special Publication Series - Geological Survey of India(36) and Memoir - Geological Society of India(25) takes almost 25% share of the total publications during the year 1990. This is also same in case of 1992 and 1994.

#### RANKING OF TOP INSTITUTIONS AS PER THEIR PUBLICATIONS COUNT

Geological Survey of India (GSI), India (272) tops the list followed by Wadia Inst. Himalayan Geol., Dehra Dun, India (93) and both together take 30% share of the total publications as is seen from Table 12 below. It is interesting to note that 70% of total publications is shared by the first 10 Institutions in India during the year 1990. But in 1992, National Geophysical Research Institute, Hyderabad contributed nearly 5 % of total publications and occupied second position after GSI. During 1994, Natl. Inst. Oceanogr., Dona Paula, Goa occupied second position by contributing 22 publications. Both these Institutions are national laboratories under the Council of Scientific & Industrial Research (CSIR).

## TOP UNIVERSITIES AS PER THEIR PUBLICATIONS COUNT

As per the publications count, Banaras Hindu Univ., Varanasi tops the list with 27 publications followed by Andhra Univ., Visakhapatnam with 26, Jadavpur University, Calcutta with 23 and Univ. Roorkee, Roorkee with 23 publications during 1990. However, during 1992 and 1994 , Univ. Roorkee, Roorkee with 30 and 10 respectively was on the top.

## **ORGANISATION-WISE DISTRIBUTION OF ALL INDIAN EARTH SCIENCE PUBLICATIONS**

Institution-wise list of distribution of all the Indian Earth Sciences publications published during the years 1990, 1992 & 1994 are provided in the Tables 15, 16 & 17 respectively.

Tables 15A, 16A and 17A provides the list of top 10 ranked institutions published the highest number of publications during the years 1990, 1992 & 1994.

It is again found that all the above 10 publications are published from India and the Journal of Geological Society of India is the only journal which has SCI's IF value of 0.355.

#### **SUBJECT (CATEGORY CODE) VS. COUNTRY-WISE DISTRIBUTION OF PUBLICATIONS**

It is found from the Table -21 that during the year 1990, USA is on the top list by contributing maximum number of publications in each and every subject category. India is contributed to some extent more publications in the area of Igneous and Metamorphic petrology(05A) (153 publications) in comparison with other countries like Italy (73), France (21), Australia (12), Netherlands (20 and Korea (1). In the area of Sedimentary Petrology (06A), India's contribution(87) is almost equal to countries like Russia(89), and crossed Japan(73). In the area of Stratigraphy(12) (112 publications), India is on the lead in comparison with countries like Italy (66) and Netherlands (42). India contributed 136 publications in the area of Applied Geophysics (20)which is equivalent to Japan (147), Germany (144) and France(144). In the area of Economic Geology(27A), India contributed 122 publications which is also more than UK(77), Japan (55) and Germany(101). Also, in the area of Engineering Geology(30), India's contribution is equivalent to Australia (94) and more than Italy (77) and Germany (78). Similar trends have been observed for the years 1992 & 1994.

Tables 21, 22 & 23 preesents Category vs Country-wise distribution of publications published during the year 1990, 1992 & 1994 respectively.

It is observed that world's largest contributed area during 1994 was 05A, so as the case in other countries. However USA has contributed in the area of 22, Australia in the area of 27A and Netherlands in the area of 20. Lowest contributed areas among all the countries are 26B, 28B and 29B. There are no contributions in the areas like 26B, 28B and 29B.

**IMPACT FACTOR (IF) VALUES OF SCIENCE CITATION INDEX (SCI)  
FOR THE YEAR 1990, 1992 & 1994**

The following Tables - 25, 26 & 27 and Figs. 6 & 7 provides IF values of SCI of Indian earth science publication published during the yaers 1990, 1992 & 1994. These serials are arranged according to the ranking of total IF values scored. It is observed that the average IF scored for the year 1990 was 0.899 for the total of 303 publications; 0.768 for the total of 269 publications in 1992 and 3.041 for the total of 405 publications in 1994. The total publications covered in SCI is increased from 303 in 1990 to 405 in 1994.
